Dear Mr. Hazem A. Ahmed:

Your paper, "*Time Aware Closed Form Frame Slotted ALOHA Frame Length Optimization*", has been accepted as part of the technical program for the IEEE Wireless Communications and Networking Conference (WCNC 2016) - Track 2 - MAC and Cross Layer Design (IEEE WCNC 2016 - Track 2 - MAC and Cross Layer Design), an educational conference sponsored by the IEEE Communications Society. Accepted papers must be presented in person by an author in order to be published in the conference proceedings. IEEE WCNC 2016 - Track 2 - MAC and Cross Layer Design will be held April 3-6, 2016 in Doha, Qatar.

I attest that you are not traveling to Qatar to perform work, but to participate in an IEEE educational conference. Please note that upon entry into Qatar, the IEEE cannot be held accountable for your expenses, actions, whereabouts or itinerary. It is the policy of the IEEE Communications Society to offer visa assistance to conference registrants who have a paid registration. We have no knowledge upon which to base any further validation of the credentials presented in this visa application.

To further assist you in obtaining a visa, below is a description of the IEEE and of the IEEE Communications Society.

The IEEE is the world's largest technical professional association dedicated to advancing technological innovation and excellence for the benefit of humanity. Founded in 1884 by a handful of practitioners of the new electrical engineering discipline, today's Institute is comprised of more than 400,000 members who conduct and participate in its activities in 160 countries. The men and women of the IEEE are the technical and scientific professionals making the revolutionary engineering advances, which are reshaping our world today.

The IEEE Communications Society embraces all aspects of the advancement of the science, engineering, technology and applications for transfer of information between locations by the use of signals. This includes: sources and destinations involving all types of terminals, computers and information processors; all pertinent systems and operations to bring about this transfer; guided and unguided transmission media; switched and unswitched networks; and network layouts, protocols, architectures and implementations.

If you have any further questions or concerns that I can address, please feel free to contact me by email at b.worthman@comsoc.org.

Sincerely yours,

Ali Ghayeb
IEEE WCNC 2016 Executive Chair
